

Basic Home Search

Last Updated Saturday, 09 January 2010

Under "Location" on the home search widget below, you can enter the City & State or the Zip Code you would like to search, and you can refine your search with the drop-down boxes provided for "Property Type" and "Price Range", etc. Plus you can also enter specific "Keywords" like Waterfront, Golf Course, or Marina to refine the search results even more.

You can also bring up a Map View of any of the matching properties by clicking on the address of the property listing. This will also give you the opportunity to "Request More Info" like Time on the Market, Property Taxes, Mortgage Information, or anything else you would like to know. Plus you can click on this [Charleston.market] Lifestyle Home Search at anytime for Search Results that are customized to your family's specific needs.
